Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-55 and 66-86, drawn to red eye correction, classified in class 382, subclass 167.

II. Claims 56-65 and 87-96, drawn to lowering the image resolution, classified in class 382, subclass 299.

- The inventions are distinct, each from the other because of the following reasons:

- Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as red eye correction. See MPEP § 806.05(d).

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
